**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling quite chilly in fresh northerly winds, especially in the morning.

Forecast for Saturday 05 Nov 2022

Weather: Although mainly dry overnight, thickening cloud and rain will spread across Wales during the morning, rain will be heavy for a time towards the west but lighter in the east with some drier periods in shelter, rain will clear east in the afternoon but some low cloud, mist and drizzle may linger a little later into the dat. Cloud eventually clearing in the afternoon with some clear spells during the evening.

Maximum wind: Southerly 30mph with gusts 40-45mph, turning southwesterly 15-20mph later.

Chance of cloud-free hill tops above 800m: 80% falling to 30% early in the morning, improving to 90% by late afternoon.

Low Cloud and visibility: Broken cloud layers forming above 500m as frontal rain moves across the area in the morning, around eastern areas towards Bala, cloud will be scattered above 600m with more chance of clear tops here. Visibility will be poor in the morning, slightly better around eastern areas during the rain and slowly improving during the afternoon to become good by late afternoon.

Temperature: **Valleys:** Plus 4 rising to 11 Celsius.
At 800m: Plus 3 rising to 7 Celsius.
Freezing level: Above all summits.

Tuesday	Southwesterly gales and showery outbreaks of rain continuing.
